Top Features

1 [Fusion with MegaMenu](#): A powerful, **Mootools** based and enhanced CSS **dropdown** menu system, with diverse features such as **multiple columns**, inline modules, icons, subtext and individual width controls, plus so much more.

2 [Gantry Framework](#): A powerful core **framework**, offering features such as per-menu item parameters, an **iPhone** version and so much more, which substantially **extends** the features and functions of the Joomla core.

3 [3rd Party Compatibility Styling](#): Compatibility styling constitutes **basic** CSS alterations to better integrate the extensions with the template, rather than full theme integration. Example extensions: **K2, Tienda, NinjaBoard, Virtuemart and JomSocial**.
